Executive Leadership for Global Majority Educators

The Rise Leaders Rise Summit is a bold, affirming and future-focused one-day leadership conference created to support and accelerate the journey of global majority educators into executive leadership. This summit has been designed in response to a persistent and deeply felt need: the underrepresentation of global majority leaders at the highest levels of educational leadership – in Multi Academy Trusts, Local Authorities, diocesan structures, and national policy spaces. While schools across the UK serve richly diverse communities, the executive leadership of the sector does not yet reflect that diversity. We believe that must change – and this summit is part of that change.
